Detailed Office Action

Comments

1. Claims 2, 5, and 15-20 were canceled by the applicant.

Response to Applicant's Arguments

2. As applicant argues, prior art reference Keneko et al. (6,088,492; "Keneko") fails to teach an optical waveguide device having a lens duct "formed integrally" with an amorphous slab waveguide. Remarks, p. 4, ll. 11-19. This argument is persuasive in light of applicant's amendments to independent claims 1 and 21 wherein applicant adds the limitations of "the at least one amorphous film-based slab waveguide including a lens duct formed integrally with the slab waveguide. These limitations facilitate the coupling of light transmitted from a diode laser.

Keneko remains the closest prior art of record in this application. However, in light of the applicant's amendment, claims 1, 3-4, 6-14; and 21-25 are allowable as distinguished over the prior art of record because of the reason stated above. It is this examiner's position that prior art, taken alone, fails to disclose or, taken in combination, fails to render obvious the limitations of the claims discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Reasons for Allowance."

Allowable Subject Matter

3. Claims 1, 3-4 and 6-14 are allowed.

Independent claim 1 is allowed because the prior art, taken alone, fails to disclose or, taken in combination, fails to render obvious an optical waveguide device comprising: at least one laser diode; at least one amorphous film-based slab waveguide; wherein the at least one amorphous film-based slab waveguide includes a lens duct formed integrally with the slab waveguide; in combination with the other recited limitations in the claim.

Claims 3-4 and 6-14 are allowable as dependent upon claim 1.

4. Claims 21-25 are allowed.

Independent claim 21 is allowed because the prior art, taken alone, fails to disclose or, taken in combination, fails to render obvious an optical waveguide device comprising: at least one laser diode; at least one amorphous film-based, biased pulsed DC plasma vapor-deposited slab waveguide; wherein the at least one amorphous film-based slab waveguide includes a lens duct formed integrally with the slab waveguide; in combination with the other recited limitations in the claim.

Claims 22-25 are allowable as dependent upon claim 21.

Conclusion

5. The prior art made of record in Form 892 and not relied upon is considered pertinent to applicant's disclosure.
